

# ASTROTREFF

Objects of the Month

2021

|                    |   |
|--------------------|---|
| Nebulae            | 4 |
| Planetary Nebulae  | 3 |
| Supernova Remnants | 1 |
| Galaxies           | 4 |
| Galaxy Groups      | 5 |

# Index

| JANUARY                                                      |       |                 |
|--------------------------------------------------------------|-------|-----------------|
| NGC2359 - "Thor's Helmet"                                    | E Neb | Canis Major     |
| FEBRUARY                                                     |       |                 |
| "Eridanus Triplet"                                           | GxGrp | Eridanus        |
| MARCH                                                        |       |                 |
| IC443 - "Jellyfish Nebula"                                   | SNR   | Gemini          |
| APRIL                                                        |       |                 |
| Arp 84 (NGC5394 & NGC5395) - "the Heron"                     | GxGrp | Canes Venatici  |
| MAY                                                          |       |                 |
| NGC3344                                                      | Gx    | Leo Minor       |
| NGC2859                                                      | Gx    | Leo Minor       |
| Arp 270 (NGC3395 & NGC3396)                                  | GxGrp | Leo Minor       |
| Arp 206 (NGC3432 - "Knitting Needle Galaxy" & MCG+06-24-027) | GxGrp | Leo Minor       |
| NGC3245                                                      | Gx    | Leo Minor       |
| NGC3245A                                                     | Gx    | Leo Minor       |
| JUNE                                                         |       |                 |
| NGC6309 - "Box Nebula"                                       | P Neb | Ophiuchus       |
| JULY                                                         |       |                 |
| NGC6888 - "Crescent Nebula"                                  | E Neb | Cygnus          |
| AUGUST                                                       |       |                 |
| Messier 16 (NGC6611) - "Eagle Nebula"                        | E Neb | Serpens (Cauda) |
| SEPTEMBER                                                    |       |                 |
| NGC6826 - "Blinking Planetary"                               | E Neb | Cygnus          |
| OCTOBER                                                      |       |                 |
| Messier 76 (NGC650 & NGC651) - "Little Dumbbell Nebula"      | PN    | Perseus         |
| NOVEMBER                                                     |       |                 |
| Holmberg 796 (NGC7332 & NGC7339)                             | GxGrp | Pegasus         |
| DECEMBER                                                     |       |                 |
| IC349 - "Barnard's Nebula"                                   | R Neb | Taurus          |
